mission of Argentine Republic and the Tubernational college of ence and the Tubernational college of experience that the waves undermines the embanance of the waves undermines the subal college of the waves undermines the manner of the waves undermines the subal college of the waves undermines the subal college of the waves undermines the subal college of the waves underm His mission in Japan has been for the purpose of creating interest in the great fair to be held in Buenos Ayres in 1910, to celebrate the Argentine emancipation, and his trip through the United States has the same object in view.

Dr. del Castillo was a visitor in this city five years ago, and he expressed his delight yesterday at noticing maffy marks of improvement here since that time. He had hoped, he said, to be here at least a week, but the message which he is to deliver in Washington makes it necessary to hasten on. In the interests of the papers he represents, he has circled the earth several times. He spent some time in the United States some years ago, and has written a book on this country and his experiences here, which has been published in his country under the title, "Dos America." In this book one whole chapter is devoted to the city of Salt Lake, its history and how it impressed the man from Argentine. Dr. del Castillo was a visitor in this

its listory and how it impressed the man from Argentine.

Dr. del Castillo talks enthusiastically about the prosperity of his country and the manner in which it has leaped forward since becoming a republic. He says the country now has a population of 73, 000,000 people. Buenos Ayres has a population of 1,250,000 persons, of whom 100,000 are originally from North America. Agriculture has taken great strides within culture has taken great strides within the last few years, due very largely, he says, to the introduction of farming machinery from the United States.

AMUSEMENTS

"The Girl Question" drew another good house at the theatre last evening. The concluding performances of this really excellent musical comedy will be given to-

"Shaun Rhue," the Irish play in which Joe Murphy made much of his fame, is finishing the week at the Colonial. The houses all week have been good and ap-

Audiences at the Bungalow this week have thoroughly appreciated the presenta-tion of "La Tosca" by the Willard Mack company and the house has been well filled from the opening night. Mary Hall as Floria Tosca has made the biggest kind of a hit, and the manner in which this difficult play has been handled by the company is distinctly creditable.

This afternoon and evening the last two performances of the good bill now running at the Orpheum will be given. There is considerable mirth and melody. "The Plana Trinity," the new Salt Lake act in which D. Bert Anderson, Thomas C. Hand, jr., and F. Hardie Meakin appear, will probably be seen for the last time for some time to come.

The last presentations of "At the Stroke of Twelve" will be given today. Next week Edward De Courcey's powerful pas-toral melodrama in four acts, "An Or-

Another good bill is claimed to be the order this week at the Lyric. Among the features is the spectacular piece "The Last Days of Pompeli." The bill goes for the first time this afternoon.

LUCIN CUT-OFF IS TO BE PROTECTED

BURLINGTON LEADS IN CUTTING DOWN FARES

St. Joseph, April 16.—The Burlington railway will make a 2½-cent passenger rate in Missouri probably effective May 1. This announcement was made by the officials of the company in Chicago today and wired to their attorney here.

Chicago, April 16.-In advance of official information the action of the Burlington today in announcing a 2½-cent passenger rate in Missouri is regarded as a diplomatic move which will end the litigation between that state and the railroads, all of which are expected to fol-low the Burlington's land in that state. The Burlington's announcement of a rate which looks like a compromise is taken to indicate that a way has been found out of the difficulty satisfactory both to

WORK IS PROGRESSING IN LAS VEGAS SHOPS

J. S. Wilkinson, locomotive engineer for the Lake Shore & Michigan Southern railroad, whose home is in Jackson, Mich., passed through Sait Lake yesterday on his way home from a visit in the west and especially in California. It was the first vacation he had taken, he said, in fourteen years. He spent much of his time in studying railroad work in the west and was much interested by watching the shop construction in Las Vegas recently. He spoke about the 460x50 feet machine shop being built at Las Vegas by the Sait Lake Route. This building, he said, is to be ideal and he took down some figures he got on the ground. The walls will be 17 inches thick and 40 feet high. The walls are to be of cement blocks and it will require 80,000 of them, hollow and 12x12x17 inches in size. They are being manufactured on the ground by two machines which turn them out at the rate of 800 per day.

The roof of the machine shop will be steel trussed, supported in the center by laced steel columns, and 2,000,000 pounds of steel will be required in the center by laced steel columns, and 2,000,000 pounds of steel will be required in the construction of this building alone.

Adjoining the machine shop will be the transfer, 80x140 feet in size. By means of this heavy machinery may be quickly and easily placed at any point in the shop required, a 70-foot traveling crane with a run of 306 feet will be installed. This crane will be capable of easily pleking up the heaviest focomotive made.

The power house will be 80x22 feet in size and will contain three 130-horse-power J. S. Wilkinson, locomotive engineer for the Lake Shore & Michigan Southern railroad, whose home is in Jackson, Mich.
